MISSOURI

HOLIDAY CRASHES

REPORT

Principal Staff Researcher:

Phyllis Emmel, Research Analyst

MISSOURI STATE HIGHWAY PATROL STATISTICAL ANALYSIS CENTER 1510 East Elm Jefferson City, Missouri 65101 (573) 751-9000 x-2299

FOREWORD

This report is produced annually by the Missouri State Highway Patrol Statistical Analysis Center and Public Information and Education Division. It contains statistics on the State's holiday traffic crash experience. Each year Missouri law enforcement officials and other traffic safety authorities are faced with increased traffic safety problems during the Memorial Day, Fourth of July, Labor Day, Thanksgiving, Christmas, and New Year holidays. This report's findings can be used to develop better traffic safety programs designed for reducing the frequency and/or severity of crashes during these holiday periods.

Please take full advantage of the data contained in this report when developing traffic safety plans and programs for future holiday seasons. In addition, if you require other types of information services, the Public Information and Education Division of the Missouri State Highway Patrol will be glad to assist you.

JAMES F. KEATHLEY, Colonel Superintendent

ACKNOWLEDGEMENTS

This publication was developed at the request of the Missouri State Highway Patrol Public Information and Education Division. Traffic crash data were obtained from the Statewide Traffic Accident Records System (STARS). The Missouri State Highway Patrol, Traffic Division, is responsible for coordinating the STARS program and maintaining the STARS central repository.

Special recognition is given to all Missouri law enforcement agencies and officers who provide traffic crash investigation services on Missouri's roadways and conscientiously report their findings to STARS. Due to their efforts, law enforcement authorities and other traffic safety officials are able to analyze their crash problems and address them through development of better traffic safety policies and programs.

The ability to analyze STARS data has been greatly enhanced, in part, due to the Missouri Traffic Records Committee. The Committee was developed to act as an advisory body to the Missouri State Highway Patrol for upgrading and maintaining the STARS system. Over the years, it has played an active role in improving the capabilities of this key traffic safety information system.

Finally, the U.S. Department of Transportation, National Highway Traffic Safety Administration, has allocated grant funds to the Missouri State Highway Patrol, Statistical Analysis Center, to provide statistical information services and develop publications, such as this report, for Missouri traffic safety authorities.

EXECUTIVE SUMMARY

The purpose of this report is to provide the Missouri State Highway Patrol (MSHP) and other State and local traffic safety authorities with information about Missouri's holiday traffic crash experience. The source of data used in this study was the Missouri Statewide Traffic Accident Records System (STARS). This report contains historical data encompassing the last five years of Missouri's holiday traffic crash experience with emphasis on the latest year (2006).

Missouri traffic safety authorities recognize holidays are an especially hazardous time for the driving public. From 2002 through 2006, one person was killed in a traffic crash every 7.4 hours in the State of Missouri. Over the holidays, one person was killed every 6.5 hours during the same five-year period. A total of 362 persons were killed over these holidays and 16,440 were injured.

- Over the Memorial Day holiday, 52 persons were killed and 2,941 were injured in Missouri from 2002 through 2006. In 2006, there were 1,227 traffic crashes in which 12 persons were killed and 591 were injured. One person was killed or injured every 7.8 minutes.
- Over the Fourth of July holiday, 74 persons were killed and 3,664 were injured from 2002 through 2006. There were 1,669 traffic crashes in 2006 in which 12 persons were killed and 840 were injured. One person was killed or injured every 7.2 minutes.
- Over the Labor Day holiday, 73 persons were killed and 2,822 were injured in Missouri from 2002 through 2006. In 2006, there were 1,108 traffic crashes in which 18 persons were killed and 502 were injured. One person was killed or injured every 9.0 minutes.
- Over the Thanksgiving holiday, 82 persons were killed and 2,993 were injured in Missouri from 2002 through 2006. In 2006, there were 1,387 traffic crashes in which 15 persons were killed and 581 were injured. One person was killed or injured every 10.3 minutes.
- Over the Christmas holiday, 33 persons were killed and 1,797 were injured in Missouri from 2002 through 2006. There were 936 traffic crashes in 2006 in which 6 persons were killed and 382 were injured. One person was killed or injured every 12.1 minutes.
- Over the New Year holiday, 48 persons were killed and 2,223 were injured in Missouri from 2002 through 2006. In 2006, there were 1,119 traffic crashes in which 8 persons were killed and 454 were injured. One person was killed or injured every 10.1 minutes.

INTRODUCTION

This report is one in a series which present data identifying the magnitude, severity, and characteristics of traffic crashes occurring over holidays in Missouri. The findings described in this report are based on five years of the State's holiday traffic crash experience (2002 - 2006) with special emphasis on the last year (2006).

Missouri traffic safety authorities have expressed an interest in studying holiday traffic crashes. Travel patterns change for many persons during these time periods. In many instances, persons take long trips at the start of the holiday and return on the last day. The volume of traffic on interstates and other major arterials having high speed limits dramatically increases during these time periods creating or magnifying congestion on these roadways.

In addition, many holiday time periods start at the end of a full workday after which drivers take long trips. Fatigue, resulting from lack of rest, as well as rising expectations of reaching destinations, no doubt reduces defensive driving abilities and increases the likelihood of committing driver error, such as speeding. In addition, holiday travelers making the return trip may experience similar problems due to their heavy involvement in recreational or other activities.

Recreational activities increase over holiday periods, along with consumption of alcoholic beverages as well as other types of intoxicants. This heavy consumption increases the chance of serious traffic crashes occurring as a result of intoxicated drivers and/or pedestrians.

Missouri law enforcement agencies and other traffic safety authorities take special precautions aimed at reducing holiday traffic crash levels, as well as their severity. Law enforcement agencies direct their forces to those roadways having inordinate amounts of holiday traffic. Some agencies set up special programs, such as arranging to have intoxicated persons driven home to prevent them from driving while intoxicated. Many law enforcement agencies and other traffic safety authorities conduct media campaigns to alert the public to the increased driving hazards they may experience over the holidays.

The intent of this report is to provide these traffic safety authorities with baseline information about Missouri's holiday traffic crash experience. This information can be used to develop more effective holiday traffic safety countermeasure programs.

Data used in this study were obtained from the Missouri Statewide Traffic Accident Records System (STARS). In accordance with State statute, law enforcement agencies are required to investigate traffic crashes occurring on public roadways if they involve death or personal injury or property damage over \$500.00. The results of their investigation are entered on uniform traffic accident report forms and forwarded to the Missouri State Highway Patrol (MSHP) Traffic Division. Staff from the MSHP Traffic Division encode data from these reports to computerized files. These files are made available to the MSHP Statistical Analysis Center (SAC) to conduct this analysis.

The findings from this study are described in the following three sections. The first section displays the 2006 Missouri Holiday Traffic Safety Clock. This clock offers an overview of the frequency of deaths and injuries caused by holiday traffic crashes over time. The second section presents data on Missouri's traffic crashes related to specific holidays. Holidays addressed in this section are:

- Memorial Day
- Fourth of July
- Labor Day
- Thanksgiving
- Christmas
- New Year

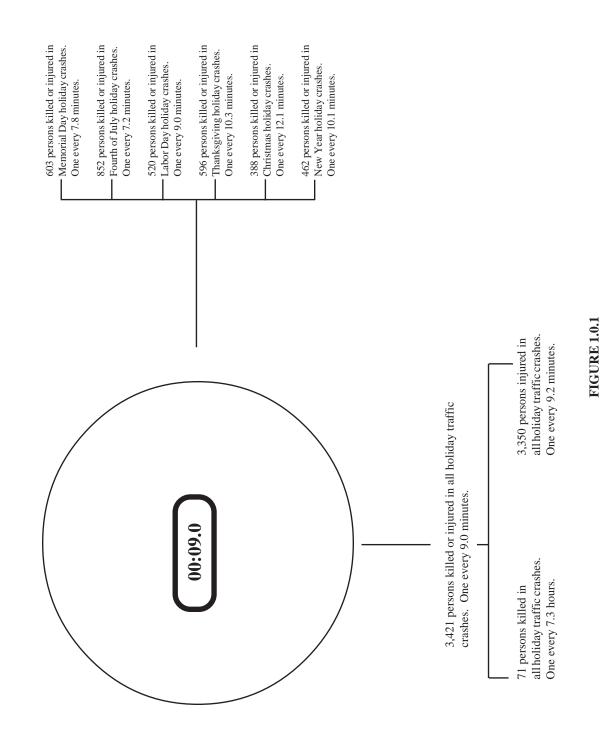

The last section provides summary data on the 2006 holiday traffic crashes in all counties and cities with populations of 1,000 or more in the State of Missouri.

1.0 MISSOURI HOLIDAY TRAFFIC SAFETY PERSONAL INJURY PROBLEM ANALYSIS CLOCK

THIS CLOCK SUMMARIZES PERSONS KILLED AND INJURED IN TRAFFIC CRASHES IN THE STATE OF MISSOURI DURING 2006 HOLIDAYS IN RELATION TO TIME. THIS CLOCK SHOULD BE VIEWED WITH CARE. THIS MODE OF DISPLAY SHOULD NOT BE TAKEN TO IMPLY A REGULARITY IN THE OCCURRENCE OF DEATHS AND INJURIES IN HOLIDAY TRAFFIC CRASH ACTIVITY; RATHER, IT REPRESENTS THE RATIO OF DEATHS AND PERSONAL INJURIES TO HOLIDAY TIME INTERVALS.

MISSOURI HOLIDAY TRAFFIC SAFETY PERSONAL INJURY PROBLEM ANALYSIS CLOCK

2.0 MISSOURI DETAIL HOLIDAY CRASHES PROBLEM ANALYSIS

A SERIES OF TABLES AND FIGURES SUMMARIZES MISSOURI'S HOLIDAY CRASH EXPERIENCE INCLUDING A DESCRIPTION OF CHARACTERISTICS AND CAUSAL FAC-TORS WHICH MAY HAVE CONTRIBUTED TO THE FREQUENCY AND/OR SEVERITY OF THESE CRASHES. DETAIL ANALYSIS IS PROVIDED FOR THE FOLLOWING SPECIFIC HOLIDAYS :

- MEMORIAL DAY
- FOURTH OF JULY
- LABOR DAY
- THANKSGIVING
- CHRISTMAS
- NEW YEAR

This section presents a series of data displays which describe Missouri's traffic crash experience over the Memorial Day holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2002 2006), 52 persons have been killed and 2,941 have been injured in traffic crashes on Missouri roadways over Memorial Day holidays.
- Over the 2006 Memorial Day holiday, Missouri had 1,227 traffic crashes. In these crashes, 12 persons were killed and 591 were injured.
- Over the 2006 Memorial Day holiday, one person was killed or injured every 7.8 minutes.
- Of all 2006 Memorial Day holiday traffic crashes, the first harmful event in 54.0% of the incidents involved one motor vehicle in transport striking another motor vehicle in transport. In 24.3% of the cases, the first harmful event involved a motor vehicle striking a fixed object.
- Of all 2006 Memorial Day holiday traffic crashes, 57.1% occurred in an urban area and 42.9% occurred in a rural area of the State. Of all 2006 fatal Memorial Day traffic crashes, 75.0% occurred in a rural area.
- Drinking by drivers and pedestrians was a contributing circumstance in 7.3% of all traffic crashes over the 2006 Memorial Day holiday. However, it was a contributing circumstance in 13.1% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 16.7% of all traffic crashes occurring over the 2006 Memorial Day holiday. However, it was a contributing circumstance in 25.2% of the fatal and personal injury crashes.
- Of the eight occupants killed in automobiles, trucks, vans, or motor homes (vehicles normally having safety restraint devices), the restraint device was used in two cases and in six cases the restraint device was not used.

INATTENTION	26.8	28.9

¹This table identifies the percentage of Memorial Day holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2006 Missouri fatal and personal injury Memorial Day holiday crashes, it was found that in 25.2% of the crashes one or more drivers were speeding. In all Memorial Day holiday traffic crashes, 16.7% had one or more drivers who were speeding.

¹Percentage is based on Memorial Day holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 0.5% or more of these crashes are listed.

This section presents a series of data displays which describe Missouri's traffic crash experience over the Fourth of July holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2002 2006), 74 persons have been killed and 3,664 have been injured in traffic crashes on Missouri roadways over Fourth of July holidays.
- Over the 2006 Fourth of July holiday, Missouri had 1,669 traffic crashes. In these crashes, 12 persons were killed and 840 were injured.
- Over the 2006 Fourth of July holiday, one person was killed or injured every 7.2 minutes.
- Of all 2006 Fourth of July holiday traffic crashes, the first harmful event in 57.9% of the incidents involved one motor vehicle in transport striking another motor vehicle in transport. In 24.9% of the cases, the first harmful event involved a motor vehicle striking a fixed object.
- Of all 2006 Fourth of July holiday traffic crashes, 60.4% occurred in an urban area and 39.6% occurred in a rural area of the State. However, in 2006 fatal Fourth of July traffic crashes, 83.3% occurred in a rural area.
- Drinking by drivers and pedestrians was a contributing circumstance in 7.8% of all traffic crashes over the 2006 Fourth of July holiday. However, it was a contributing circumstance in 12.0% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 17.8% of all traffic crashes occurring over the 2006 Fourth of July holiday. However, it was a contributing circumstance in 25.8% of the fatal and personal injury crashes.
- Of the ten occupants killed in automobiles, trucks, vans, and motor homes (vehicles normally having safety restraint devices), the restraint device was used in one case and in nine cases the restraint device was not used.

TYPE OF CIRCUMSTANCE INVOLVED BY CRASH SEVERITY¹

¹This table identifies the percentage of Fourth of July holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2006 Missouri fatal and personal injury Fourth of July holiday crashes, it was found that in 25.8% of the crashes one or more drivers were speeding. In all Fourth of July holiday traffic crashes, 17.8% had one or more drivers who were speeding.

¹Percentage is based on Fourth of July holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 0.5% or more of these crashes are listed.

TABLE 2.2.15

This section presents a series of data displays which describe Missouri's traffic crash experience over the Labor Day holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2002 2006), 73 persons have been killed and 2,822 have been injured in traffic crashes on Missouri roadways over Labor Day holidays.
- Over the 2006 Labor Day holiday, Missouri had 1,108 traffic crashes. In these crashes, 18 persons were killed and 502 were injured.
- Over the 2006 Labor Day holiday, one person was killed or injured every 9.0 minutes.
- Of all 2006 Labor Day holiday traffic crashes, the first harmful event in 53.1% of the incidents involved one motor vehicle in transport striking another motor vehicle in transport. In 25.1% of the cases, the first harmful event involved a motor vehicle striking a fixed object.
- Of all 2006 Labor Day holiday traffic crashes, 61.1% occurred in an urban area and 38.9% occurred in a rural area of the State. However, in 2006 fatal Labor Day traffic crashes, 76.5% occurred in a rural area.
- Drinking by drivers and pedestrians was a contributing circumstance in 9.4% of all traffic crashes over the 2006 Labor Day holiday. However, it was a contributing circumstance in 14.7% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 15.5% of all traffic crashes occurring over the 2006 Labor Day holiday. However, it was a contributing circumstance in 22.3% of the fatal and personal injury crashes.
- Of the twelve occupants killed in automobiles, trucks, vans, and motor homes (vehicles normally having safety restraint devices) three were using a restraint device and the remaining nine were not.

¹This table identifies the percentage of Labor Day holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2006 Missouri fatal and personal injury Labor Day holiday crashes, it was found that in 22.3% of the crashes one or more drivers were speeding. In all Labor Day holiday traffic crashes, 15.5% had one or more drivers who were speeding.

¹Percentage is based on Labor Day holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 0.5% or more of these crashes are listed.

This section presents a series of data displays which describe Missouri's traffic crash experience over the Thanksgiving holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2002 2006), 82 persons have been killed and 2,993 have been injured in traffic crashes on Missouri roadways over Thanksgiving holidays.
- Over the 2006 Thanksgiving holiday, Missouri had 1,387 traffic crashes. In these crashes, 15 persons were killed and 581 were injured.
- Over the 2006 Thanksgiving holiday, one person was killed or injured every 10.3 minutes.
- Of all 2006 Thanksgiving holiday traffic crashes, the first harmful event in 53.2% of the incidents involved one motor vehicle in transport striking another motor vehicle in transport. In 23.1% of the cases, the first harmful event involved a motor vehicle striking a fixed object.
- Of all 2006 Thanksgiving holiday traffic crashes, 60.1% occurred in an urban area and 39.9% occurred in a rural area of the State. However, in 2006 fatal Thanksgiving traffic crashes, 76.9% occurred in a rural area.
- Drinking by drivers and pedestrians was a contributing circumstance in 9.2% of all traffic crashes over the 2006 Thanksgiving holiday. However, it was a contributing circumstance in 16.4% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 16.5% of all traffic crashes occurring over the 2006 Thanksgiving holiday. However, it was a contributing circumstance in 24.1% of the fatal and personal injury crashes.
- Of the twelve occupants killed in automobiles, trucks, vans, and motor homes (vehicles normally having safety restraint devices), the restraint device was used in seven cases. In three cases, the occupant was not using a restraint device and in the remaining two cases, the restraint device usage was unknown.

¹This table identifies the percentage of Thanksgiving holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2006 Missouri fatal and personal injury Thanksgiving holiday crashes, it was found that in 24.1% of the crashes one or more drivers were speeding. In all Thanksgiving holiday traffic crashes, 16.5% had one or more drivers who were speeding.

¹Percentage is based on Thanksgiving holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 0.5% or more of these crashes are listed.

TABLE 2.4.15

2.5 CHRISTMAS HOLIDAY CRASHES

This section presents a series of data displays which describe Missouri's traffic crash experience over the Christmas holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2002 2006), 33 persons have been killed and 1,797 have been injured in traffic crashes on Missouri roadways over Christmas holidays.
- Over the 2006 Christmas holiday, Missouri had 936 traffic crashes. In these crashes, 6 persons were killed and 382 were injured.
- Over the 2006 Christmas holiday, one person was killed or injured every 12.1 minutes.
- Of all 2006 Christmas holiday traffic crashes, the first harmful event in 54.3% of the incidents involved one motor vehicle in transport striking another motor vehicle in transport. In 24.2% of the cases, the first harmful event involved a motor vehicle striking a fixed object.
- Of all 2006 Christmas holiday traffic crashes, 61.2% occurred in an urban area and 38.8% occurred in a rural area of the State. However, 83.3% of the 2006 fatal Christmas traffic crashes occurred in a rural area.
- Drinking by drivers and pedestrians was a contributing circumstance in 8.3% of all traffic crashes over the 2006 Christmas holiday. However, it was a contributing circumstance in 14.3% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 13.6% of all traffic crashes occurring over the 2006 Christmas holiday. However, it was a contributing circumstance in 22.1% of the fatal and personal injury crashes.
- Of the four occupants killed in automobiles, trucks, vans, and motor homes (vehicles normally having safety restraint devices), the restraint device was used in two cases and not used in two cases.

TYPE OF CIRCUMSTANCE INVOLVED BY CRASH SEVERITY¹

¹This table identifies the percentage of Christmas holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2006 Missouri fatal and personal injury Christmas holiday crashes, it was found that in 22.1% of the crashes one or more drivers were speeding. In all Christmas holiday traffic crashes, 13.6% had one or more drivers who were speeding.

¹Percentage is based on Christmas holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 1.0% or more of these crashes are listed.

TABLE 2.5.15

This section presents a series of data displays which describe Missouri's traffic crash experience over the New Year holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2002 2006), 48 persons have been killed and 2,223 have been injured in traffic crashes on Missouri roadways over New Year holidays.
- Over the 2006 New Year holiday, Missouri had 1,119 traffic crashes. In these crashes, 8 persons were killed and 454 were injured.
- Over the 2006 New Year holiday, one person was killed or injured every 10.1 minutes.
- Of all 2006 New Year holiday traffic crashes, the first harmful event in 52.4% of the incidents involved one motor vehicle in transport striking another motor vehicle in transport. In 26.6% of the cases, the first harmful event involved a motor vehicle striking a fixed object.
- Of all 2006 New Year holiday traffic crashes, 64.8% occurred in an urban area and 35.2% occurred in a rural area of the State. However, in fatal New Year holiday crashes, 66.7% occurred in a rural area.
- Drinking by drivers and pedestrians was a contributing circumstance in 11.8% of all traffic crashes over the 2006 New Year holiday. However, it was a contributing circumstance in 21.3% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 23.9% of all traffic crashes occurring over the 2006 New Year holiday. However, it was a contributing circumstance in 33.1% of the fatal and personal injury crashes.
- Of the eight occupants killed in automobiles, trucks, vans, and motor homes (vehicles normally having safety restraint devices), the restraint device was used in four cases and not used in four cases.

TYPE OF CIRCUMSTANCE INVOLVED BY CRASH SEVERITY¹

¹This table identifies the percentage of New Year holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2006 Missouri fatal and personal injury New Year holiday crashes, it was found that in 33.1% of the crashes one or more drivers were speeding. In all New Year holiday traffic crashes, 23.9% had one or more drivers who were speeding.

¹Percentage is based on New Year holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 0.5% or more of these crashes are listed.

3.0 MISSOURI COUNTY AND CITY HOLIDAY CRASH ANALYSIS

A SERIES OF TABLES SUMMARIZES 2006 HOLIDAY CRASH ACTIVITY ASSOCIATED WITH ALL COUNTIES, AS WELL AS ALL CITIES HAVING POPULATIONS OF 1,000 OR MORE IN THE STATE OF MISSOURI. PLEASE NOTE THAT ALL 2006 HOLIDAY CRASHES OCCURRING IN A GIVEN COMMUNITY ARE DISPLAYED REGARDLESS OF THE LAW EN-FORCEMENT AGENCY THAT INVESTIGATED THE TRAFFIC CRASH.

¹ All traffic crash activity occurring in a county and cities within a county is presented in this data display. A note of caution is warranted for cities whose jurisdictional boundaries cover more than one county. For City A whose boundaries fall in County A and County B - County A's portion of the data display will have County A City A's traffic crash activity presented. County B's portion of the data display will have County A City A's traffic crash activity presented. County B's portion of the data display will have County B City A's traffic crash activity presented. Those cities falling in more than one county can be identified by their name being followed by a slash (/) and the first three letters of the county name (e.g., Kansas City / JAC). Table 3.0.2 is presented to identify the total crash activity of these multi-county cities.
