

**Classification:** Computer Information Technologist II  
Server Support Unit  
**Title Code:** V08002  
**Pay Range:** 25

**POSITION SUMMARY:**

This is an intermediate-level position which will work in the support and coordination of computer information technology services and activities. An employee in this class provides support and administration of server software and server infrastructure. Work generally focuses on the implementation and support of the server infrastructure, server operating systems and server related applications. This position will be performing technical work in advanced topics such as federated services, virtualization, server security, performance management. Work is performed under general supervision.

**DESCRIPTION OF DUTIES PERFORMED:**

(Any one position may not include all of the duties listed nor do the listed examples include all tasks which may be found in positions of this class.)

Assists with administering Windows, Linux and Advanced Interactive eXecutive (AIX) servers including capacity planning, monitoring, troubleshooting and tuning.

Assists with designing and administering virtual environments such as VMware and Hyper V to create, modify and implement virtual servers, as well as the development of and management of virtual desktop environments.

Storage administration, space management, capacity forecasting, asset and performance management, equipment life cycle management, and troubleshooting.

Assists with designing and administering server system applications including Active Directory, Domain Name Servers (DNS), Exchange, Content Manager, Lotus Notes, SharePoint, Team Foundation Server, WebSphere, MSSQL, IIS and various other applications.

Assists with designing and administering server and storage hardware/technology such as blade centers, network attached storage, Internet Small Computer System Interface (iSCSI), Fibre Channel, storage area networks and storage virtualization.

Assists with designing and administering backup and disaster recovery solutions such as Data Domains, SRM, and SDN.

Assists with designing and administering security and monitoring applications for the server and storage infrastructure.

Performs other related work as assigned.

**REQUIRED KNOWLEDGE, SKILLS, AND ABILITIES:**

Working knowledge of the principles of computer programming and systems analysis, design, testing, and documentation.

Working knowledge of the general operating principles and capabilities of computer hardware and software.

**Classification:** Computer Information Technologist II  
Server Support Unit

**Title Code:** V08002

**Pay Range:** 25

Page 2

Working knowledge of or ability to learn the Criminal Justice Information Services (CJIS) Security Policy.

Working knowledge of or ability to learn the MULES system as it relates to the technical connectivity and CJIS requirements.

Knowledge of software reference libraries and related utility programs.

Knowledge of computer security systems and procedures.

Knowledge of computer networking and telecommunications.

Knowledge of computer operating systems.

Knowledge of database management systems.

Knowledge of or ability to learn the agency's automated information systems.

Knowledge of or ability to learn the agency's functions and their interrelationships.

Knowledge of the principles of cost benefit analysis.

Knowledge of the principles of project management.

Knowledge of the principles of disaster recovery.

Knowledge of the procurement process.

Knowledge of continuing trends and developments in computer hardware and software.

Knowledge of various computer platforms.

Knowledge of the information strategic planning process.

Knowledge of the systems management process.

Knowledge of the principals of information system audits and security testing.

Possess good organizational skills.

Possess research and analysis skills.

Ability to learn to utilize project management tools.

Ability to learn to prepare and interpret server-related documentation.

Ability to learn to prepare and maintain standards, policies, procedures, guidelines and technical manuals.

Ability to learn to troubleshoot and resolve hardware and/or software problems.

Ability to learn to create and present materials for training programs.

**Classification:** Computer Information Technologist II  
Server Support Unit

**Title Code:** V08002

**Pay Range:** 25
