

Classification: Computer Information Technologist II
Technical Support Unit (TSU)

Title Code: V08002

Pay Range: 25

POSITION SUMMARY: This is an intermediate-level position providing technical and professional work in the support and coordination of computer information technology (CIT) services and activities. An employee in this position provides technical support in personal computer (PC) administration and end-user support focused in installation, maintenance, and administration of a critical public safety data center infrastructure requiring high availability to maintain agency operations and life safety. Work is focused on assisting with the implementation and maintenance of public safety computing equipment, to include operation of a 24/7/365 call center. This position may be assigned to either Tier 1 or Tier 2 support in TSU, and work is performed under general supervision.

DESCRIPTION OF DUTIES PERFORMED (Any one position may not include all of the duties listed nor do the listed examples include all tasks which may be found in positions of this class.):

Tier 1 will perform the following:

Provides support of the Patrol's 24/7/365 technical support call center to resolve end user CIT issues.

Develops, updates, and maintains the technical support call center procedures and processes, to include ticket management and resolution, and customer service.

Collects accurate and thorough documentation of information regarding CIT issues into a ticket management database, while ensuring routing as well as any necessary progression to advanced tiers of CIT support.

Provides support and building PC's, tablets, and other end-user focused devices and associated peripherals.

Assists with maintaining accurate inventory and accounting of all equipment assigned to the TSU, to include equipment awaiting pick-up and/or brought in for repair/replacement.

Assists with monitoring various critical infrastructure technology components essential to maintaining department operations.

Assists with serving as a liaison to other agencies, vendors, contractors, and other units and divisions of state government and the Patrol to ensure issues involving critical systems are resolved quickly and completely.

Assists with maintaining awareness of Patrol operations, to include command changes and ongoing special operations, in order to provide customer service and support to the Patrol and Missouri law enforcement missions.

Assists in providing support to TSU project objectives and deadlines, as needed.

Works shifts as assigned to provide 24/7/365 coverage.

Performs other related work as assigned.

Tier 2 will perform the following:

Assists with providing advanced support of the Patrol's 24/7/365 technical support call center to resolve end user CIT issues.

Assists with developing, updating, and maintaining advanced technical support call center procedures and processes, to include ticket management and resolution, and customer service.

Assists with the collection of accurate and thorough documentation of information regarding advanced CIT issues into a ticket management database, while ensuring routing as well as any necessary progression to advanced tiers of CIT support.

Assists with providing support for advanced troubleshooting and problem resolution for CIT issues, to include monitoring various critical infrastructure technology components essential to maintaining department operations.

Assists with serving as a liaison to other agencies, vendors, contractors, and other units and divisions of state government and the Patrol to ensure issues involving critical systems are resolved quickly and completely.

Assists with maintaining accurate inventory and accounting of all equipment assigned to the TSU, to include equipment awaiting pick-up and/or brought in for repair/replacement.

Assists with maintaining awareness of Patrol operations, to include command changes and ongoing special operations, in order to provide customer service and support to the Patrol and Missouri law enforcement missions.

Assists in providing support to TSU project objectives and deadlines, to include PC deployment and TSU project management, as needed.

Works shifts as assigned to provide 24/7/365 coverage.

Performs other related work as assigned.

REQUIRED KNOWLEDGE, SKILLS, AND ABILITIES: Working knowledge of the general operating principles and capabilities of data processing hardware and software.

Working knowledge of PC and operating system administration, as well as system analysis, troubleshooting, testing, and documentation.

Working knowledge of general office practices and procedures.

Working knowledge of customer service fundamentals, to include problem resolution, empathy, critical thinking and proper documentation of issues.

Working knowledge of technical call center industry best practices and continuing trends and developments in computer hardware and software.

Working knowledge of software reference libraries and related utility programs.

Working knowledge of computer security systems and procedures.

Working knowledge of file back-up, restore and archival processes, and principles of disaster recovery.

Working knowledge of computer operating systems and various computer platforms.

Working knowledge of the agency's automated information systems.

Working knowledge of the agency's functions and their interrelationships.

Knowledge of the information strategic planning process.

Knowledge of the systems management process.

Possess excellent customer service and communication skills.

Possess good organizational skills.

Possess research and analysis skills.

Ability to assist in preparing and interpreting end-user and PC support related documentation.

Ability to assist in preparing and maintaining standards, policies, procedures, guidelines and technical manuals.
