

**Classification:** Computer Information Technology Specialist (CITS) I  
Product Research Unit  
**Title Code:** V08004  
**Pay Range:** 30

**POSITION SUMMARY:**

This is professional, technical, and consultative work in the support and coordination of computer information technology services and activities as related to new product research and contract management. An employee in this class provides research, business, fiscal, and contractual expertise in computer systems analysis, design, purchase, and implementation. Systems to be managed and/or researched include: database and/or network technologies; cybersecurity; and/or other computer information technology specialties in a midrange, and/or microcomputer environment. An employee in this class will also provide technology and business research expertise and guidance in all areas and platforms listed above. Work generally focuses on specializing in technology research specialty that may cross environments. Work includes conducting feasibility, fiscal, and impact studies of technology direction and providing strategic planning and recommendations. Duties may also include implementation of recommendations, project management, and/or technical consultative services. Work is performed under general supervision; however, the employee is expected to exercise independence in the performance of assigned responsibilities.

**DESCRIPTION OF DUTIES PERFORMED:**

(Any one position may not include all of the duties listed nor do the listed examples include all tasks which may be found in positions of this class.)
