# SUMMARY REPORT

## MISSOURI CRIME VICTIMIZATION SURVEY, 2016

### Description of Reports

A total of six reports, including this one, have been produced from the MCVS data. The following is a description of each report.

Summary Report: This report contains 1) an introduction that describes the sample and population demographics, a Missouri metro/nonmetro county map, and a description of demographic variables, and 2) cross tabulations between demographic characteristics and (a) crime percentage distributions, (b) follow up questions for crime victimizations, and (c) perceptions of crime, community, law enforcement, and policy. The appendices include the survey script, methodology, and the number of respondents per county.

Executive Report: This report presents overall prevalence of crime victimization for the state of Missouri, and summarizes results from the reports on perceptions of law enforcement, neighborhood trust, safety, and fear, and intimate partner violence. The report also includes a comparison of metro and nonmetro respondents, description of victims' experiences, methodological considerations, and directions for future research that have been gleaned from administering the Missouri Crime Victimization Survey.

Intimate Partner Violence Report: This report presents descriptive statistics for five types of intimate partner violence (IPV)—physical abuse, emotional abuse, harassment, stalking, and sexual abuse—by demographic characteristics.

Neighborhood Trust, Safety, and Fear Report: This report examines survey responses to questions about trusting neighbors, feeling safe in one's neighborhood, and fear of violent crime. The report presents responses to these questions by race, age, sex, education, income, and metro/nonmetro residence.

Perceptions of Law Enforcement Report: This report covers a wide array of perceptions of law enforcement, including assessment of their effectiveness regarding several types of crime (e.g. drugs, burglary) as well as whether or not they treat people fairly and with respect. The report breaks down the responses to these questions by race, age, education, and income.

# Table of Contents

Introduction .....	5
Sample and Missouri Population Demographics .....	6
Metro/Nonmetro Missouri County Map .....	7
Demographic Variable Description .....	8
Section 1: Crime Percentage Distributions .....	9-62
Property Crime.....	9-19
Robbery.....	20-21
Assault .....	22-27
Rape .....	28-29
Sexual Assault .....	30-31
Identity Theft .....	32-41
Intimate Partner Violence .....	42-62
Section 2: Follow Up Questions for Crime Victimization .....	63-66
Section 3: Perceptions of Crime, Community, Law Enforcement, & Policy .....	67-136
Perceptions of Social Problems in Missouri	
Economy .....	68-69
Illegal Immigration .....	70-71
Race Relations .....	72-73
Environment .....	74-75
Drugs .....	76-77
Fear of Crime	
How often are you fearful of being a victim of a violent crime? .....	78-79
To what degree do you think crime is a problem in your community? .....	80-81
How safe do you feel in the neighborhood where you live? .....	82-83
Collective Efficacy	
People around here are willing to help their neighbors? .....	84-85
This is a close knit neighborhood? .....	86-87
People in this neighborhood can be trusted .....	88-89
People in neighborhood don't get along with each other .....	90-91
People in neighborhood don't share the same values .....	92-93

Perceptions of Police Job Performance & Effectiveness

Overall, how would you rate the job law enforcement does in your neighborhood? ..... 94-95

How confident or not confident are you in local law enforcement? ..... 96-97

How effective is the law enforcement in your neighborhood is when people call for help? ..... 98-99

How effective is the law enforcement in your neighborhood is in controlling violent crime? ..... 100-101

How effective is the law enforcement in your neighborhood is in controlling drugs? ..... 102-103

How effective is the law enforcement in your neighborhood is in controlling burglary? ..... 104-105

Likelihood to Notify Police

How likely would you be to call the law enforcement agency to report a theft? ..... 106-107

How likely would you be to call the law enforcement agency to report a minor crime? .....108-109

How likely would you be to call the law enforcement agency to report a serious crime? ..... 110-111

How likely would you be to call the law enforcement to report that you were a victim of violent crime? ..... .. 112-113

Police Equity

The law enforcement agency that serves your neighborhood treats people with respect ..... 114-115

The law enforcement agency that serves your neighborhood treats people fairly ..... 116-117

Most police officers in my community do their job well ..... 118-119

Experiences with Police

Have you ever in your lifetime been arrested? ..... 120-121

In the last 12 months in Missouri, did you have any direct contact with police? ..... 122-123

Was this contact initiated by you or was it initiated by the officer? ..... 124-125

Overall would you rate the interaction with the officer or officers as being positive or negative? ..... 126-127

In the past 12 months in Missouri, were you treated unfairly by the police? ..... 128-129

In your lifetime, have you ever been treated unfairly by the police? ..... 130-131

Are you afraid that police will arrest you when you are completely innocent? ..... 132-133

Media

How often do you hear or read about incidents of police misconduct near and far? ..... 134-135

Appendix A –Survey Script ..... 137-168

Appendix B –Methodology Report..... 169-178

Appendix C – Number of Respondents per County..... 179-180

## Introduction

The National Crime Victimization Survey (NCVS) is conducted annually by the Bureau of Justice Statistics. Although the percent of victimizations that are not reported to law enforcement has declined<sup>1</sup> and varies across crime type, the majority of crimes remain unreported (Lynn et. al. 2012; Missouri State Highway Patrol Statistical Analysis Center 2016).<sup>2</sup> As such, the NCVS has proved to be an invaluable tool for law enforcement, policy makers, and researchers. Although the NCVS provides rich data on the extent and nature of victimization of individuals aged 12 and older in the United States, a limitation is that it does not allow for estimates at the state or lower levels of geography. Consequently, based on need and available funding, some states have conducted their own victimizations surveys.

The Missouri Crime Victimization Survey (MCVS) was conducted in spring 2016 to estimate statewide crime victimization of adults and glean information on residents' views on additional topics relevant to law enforcement. The Missouri State Highway Patrol partnered with researchers at the University of Missouri and the Wyoming Survey & Analysis Center (WYSAC) to develop and conduct the survey, and analyze the data.

The survey was largely modeled after the NCVS. It documents prevalence rates for crime victimization across crime categories (e.g. violent crime, property crime, identity related crimes and intimate partner violence). Additionally, we aimed to obtain follow-up information about the most recent victimization in each category, including but not limited to characteristics of the perpetrator and the use of victim services. Further, we included items that address respondents' perceptions of the effectiveness, conduct and bias of, and experiences with law enforcement. Lastly, the survey includes items on perceived neighborhood safety and fear of crime.

WYSAC conducted the data collection. A total of 2,008 surveys were obtained. Of these, 1,089 were completed in metro counties and 919 were completed in nonmetro counties. Black households in metro regions were oversampled. Only one adult (age 18 & over) per household was surveyed. Data were collected via both cell phones and landlines. A strength of this survey is it was designed to allow comparison of outcomes across metro and nonmetro counties within the State of Missouri.

This report contains crosstabulations of all survey outcome variables across geographic, demographic, and household characteristics. The remainder of the introduction contains sample and Missouri population demographics, a description of the demographic variables in the crosstabulations, and a map that depicts the location of metro and nonmetro counties in Missouri. Section 1 focuses on the extent of victimization across crime types. Section 2 contains information about incident characteristics and the victim's response to the incident. Section 3 presents data on attitudes toward and experiences with law enforcement, perceptions of community, and social problems. Appendix A contains the questionnaire, Appendix B is the methodology report, and Appendix C contains a state map with the number of sampled residents per county.

Funding for this project was provided by the Missouri State Highway Patrol Statistical Analysis Center who received funding from the Bureau of Justice Statistics, U.S. Department of Justice, Report No. SRC-1611 to support the project. The findings and conclusions in this report are those of the authors and do not necessarily reflect those of the MO State Highway Patrol or the Department of Justice.

Key

-  Nonmetro Area
-  Metro Area

## Demographic Variable Description

**County Type** - To identify metro and nonmetro areas, the National Center for Health Statistics metro-nonmetro classification scheme for counties was used<sup>1</sup>. Metropolitan areas contain large metro, medium metro, and small metro. Nonmetro includes micropolitan and noncore. See Figure 1 for county designation.

**Age** - Respondents report of age “What is your age?” Age groups were then collapsed into the following age brackets: 18-34, 35-49, 50-64, and 65-100.

**Sex** - Respondents report of male or female “And I’m required to ask, are you male or female?”

**Race** - Respondents were asked “Which of the following groups would you say represents your race or ethnic background?” Respondents were asked to identify themselves as White, Black or African American, Asian, Native Hawaiian or Other Pacific Islander, American Indian or Alaska Native, Other, and Don’t know/Not sure. Responses were then collapsed into the following categories: black (only), multiracial (two or more), other (Asian, Native Hawaiian or Other Pacific Islander, American Indian or Alaska Native, and Other), and White (only).

**Ethnicity** - Respondents report of Hispanic or Latino ethnicity. Respondents were asked “are you Hispanic or Latino/a?”

**Income** – Respondents report of “What is your TOTAL household income? Stop me when you hear the range that best describes your household’s total income in 2015.” Response choices include; Less than \$10,000, \$10,000 to less than \$20,000, \$20,000 to less than \$30,000, \$30,000 to less than \$40,000, \$40,000 to less than \$50,000, \$50,000 to less than \$75,000, \$75,000 to less than \$100,000, and \$100,000 and over, and Don’t know/Not sure. Responses were then collapsed into the following categories: less than \$10,000, \$10,000 to \$49,999, \$50,000 to \$74,999, \$75,000 to \$99,999, and \$100,000 or more.

**Education** – Respondents report of highest level of education completed. Respondents were asked “what is the highest level of school you completed or the highest degree you have received?” Categories include; less than high school, high school or GED completed, some college or associate degree and includes vocational, and bachelors or graduate education.

**Hours Worked per Week** – Respondents report of hours worked in a typical week. Categories were then collapsed to the following: not working, 1-39, 40 or more.

**Marital Status** – Respondents report of marital status as either married, widowed, divorced, separated, never married, and not married but living with a partner. Categories were then collapsed to currently married (married or cohabitating), or not currently married (widowed, divorced, separated, or never married).

**Children Under Age 18 in Home** – Respondents report of any children. Respondents were asked “How many children under the age of 18 reside in your household?” Categories were then collapsed to either no children, one child, two children, or three or more children.

**Adults in Home** – Respondents report of adults in the home. Respondents were asked “How many adults age 18 and over, INCLUDING YOURSELF, reside in your household?” Categories were then collapsed to either one adult, two adults, or three or more adults.

**Home Ownership** – Respondents report of home ownership. Respondents were asked “Do you own or rent your place of residence?”

**Years at Current Address** – Respondents report of years residing at current address. Respondents were asked “How long have you lived at your current address?” Categories were then collapsed to less than 1 year, 1-4 years, or 5 or more years.

**Disability** – Respondents report of being disabled or not. Respondents were asked “Do you have a disability?”

# Appendix A

## Survey Script

Hello, my name is [name] and I'm calling on behalf of the University of Missouri and the Missouri Department of Public Safety. (Optional: "How are you today?") We're conducting a survey on crime and policing in Missouri and I'd like to speak to someone in your household for a few minutes. Do you have a few minutes to help me out with this?

I won't ask for your name, address or other personal information that may identify you. Your participation in this survey is voluntary and refusal to participate will involve no penalty or loss of benefits to which you are otherwise entitled. You don't have to answer any questions you don't want to and you may end the interview at any time. The interview takes about 15 minutes. If you have questions about your rights as a research subject, you can call the UW IRB and I can provide that number.

[Contact information provided by request]

May I continue?

AskCell

Thanks! I need to ask. Have I reached you on a cell phone?

1. (Yes)
2. (No) skip to PrivHH

If cell phone:

YCell

I'm not allowed to interview you if you're driving or doing anything dangerous. May I keep going or should I call back at another time?

If not now: What would be a good time to call back?

MORes

First I need to confirm. Do you live in Missouri?

1. (Yes) Skip to Yes
2. (No)
8. (Don't know/Not sure)
9. (No Answer/Refused)

If not cell phone:

PrivHH

First I need to confirm. Is this a private household in Missouri?

1. (Yes) Skip to Yes
2. (No)
8. (Don't know/Not sure)
9. (No Answer/Refused)

If no to MORes OR PrivHH:

Not PrHH

Sorry, but we are supposed to interview only private households in Missouri. Thanks anyway!

Yes

And I also need to ask if I am speaking with someone 18 or older.

1. (Yes) Skip to PreD
2. (No)

If no:

SBELSE

Is someone there now who is 18 or older and who might be interested?

1. (Yes)
2. (No, an adult is not available just now)
3. (No, there is no adult living here)

If no, an adult is not available:

ALTER

It's really important that we hear opinions from your household. Is there a better time to call back and speak to someone 18 or older?

1. (Yes)
2. (No, don't call again)

If no, there is no adult living here:

I'm sorry but we are not supposed to interview people younger than 18.

Thanks anyway.

PreD

To get started I have a few demographic questions, which are going to tell us if we have a good representation of the population of Missouri.

Age

What is your age?

\_\_\_\_\_

Hisp

Are you Hispanic or Latino/a?

1. Yes

2. Negative
8. (Don't know/Not sure)
9. (No Answer/Refused)

Q53C

In the past 12 months in Missouri, were you unfairly stopped, searched, questioned, physically threatened or verbally abused by the police?

1. Yes
2. No
8. (Don't know/Not sure)
9. (No Answer/Refused)

Q54

In your lifetime, have you ever been unfairly stopped, searched, questioned, physically threatened or verbally abused by the police?

1. Yes
2. No
8. (Don't know/Not sure)
9. (No Answer/Refused)

Q55

Are you sometimes afraid that police will stop you and threaten to arrest you when you are completely innocent?

1. Yes
2. No
8. (Don't know/Not sure)
9. (No Answer/Refused)

Q56

When considering the internet, radio, television, or in the newspapers, how often do you hear or read about incidents of police misconduct that occur locally or elsewhere in the nation? Think about things like police use of excessive force, verbal abuse, corruption, and so on.

Would you say you hear about this...

1. Often
2. Sometimes
3. Rarely
4. Never
8. (Don't know/Not sure)
9. (No Answer/Refused)

Close

That was our last question. Thank you very much for your time and for participating in this survey. Have a great day.

# Introduction

The Missouri State Highway Patrol (MSHP), in cooperation with the University of Missouri, contracted with the Wyoming Survey & Analysis Center (WYSAC) to complete the Missouri Crime Victimization Survey, 2016. The dual frame telephone survey (RDD cellular and RDD landline) was completed by 2,008 Missouri residents between April 21<sup>st</sup> and June 3<sup>rd</sup>, 2016. By design, the sample was stratified disproportionately to achieve approximately: 1,000 completions in non-metro areas, and 1,000 completions in metro areas. Additionally, the metro region should consist of an oversample of at least 300 completions by African Americans (AA).

## Survey Facts

<b>Start and End Dates</b> April 21 <sup>st</sup> , 2016 – June 3 <sup>rd</sup> 2016
<b>Completed Surveys by Sample Frame</b> 2,008 Total Surveys 1,477 RDD Cellular (73.6%) 531 RDD Landline (26.4%)
<b>Response Rates<sup>1</sup> by Frame and Strata<sup>2</sup></b> <b>Total Sample – 8.8%</b> Metro, High AA Density, Cellular – 6.8% Metro Remaining, Cellular – 7.6% Non-Metro, Cellular – 8.9% Metro, High AA Density, Landline – 12.6% Metro Remaining, Landline – 12.0% Non-Metro, Landline – 13.9%
<b>Average Interview Length</b> 17 minutes 50 seconds
<b>Margin of Error</b> Statewide: ±2.19 Percentage Points at 95% Confidence Metro: ±2.97 Percentage Points at 95% Confidence Metro AA: ±4.95 Percentage Points at 95% Confidence Non-Metro: ±3.23 Percentage Points at 95% Confidence

<sup>1</sup>AAPOR Response Rate 4 (RR4) was used. This includes an estimate of what proportion of cases of unknown eligibility are actually eligible.

# Methods

## *Questionnaire Development*

The instrument used in the Missouri Crime Victimization Survey, 2016, was designed and refined by the client. WYSAC received a final draft of the questionnaire from the client, and the survey instrument was programmed for WYSAC's CATI (computer assisted telephone interviewing) system and tested for programming errors.

## *Mode of Contact and Mode of Data Collection*

The mode of contact and mode of data collection chosen for this project was live telephone interview.

## *Sampling Frame, Sample Design and Sample Size*

The population of interest for this survey was adult Missouri residents. Additionally, the project was designed to achieve 50% of completions in metro areas and 50% of completions in non-metro areas (approximately 1000 in each). Additionally, an effort was made to oversample the African American population in the metro areas in order to secure at least 300 (30%) completions from the AA population in the metro area. To identify metro areas and non-metro areas, the National Center for Health Statistics metro-nonmetro classification scheme for counties was used.

WYSAC utilized a dual-frame sample design for this survey consisting of RDD cellular and RDD landline frames. According to recent federal statistics, 55.8% of Missouri households are now wireless-only, with an additional 11.7% wireless-mostly<sup>3</sup>. Additionally, federal statistics show a slightly higher proportion of African American adult households nationwide are wireless only (48.5%) compared to white households (44.0%)<sup>4</sup>. As a result, the sample was initially designed to achieve roughly 65-75% of completions via cellphone to achieve the most accurate representation of the population, as well as to aid in the oversampling of the AA population.

As a result of the need to achieve 30% of completions in the metro region with African American respondents (where approximately 14.4% of the population is AA), the sample was

<sup>3</sup> [http://www.cdc.gov/nchs/data/nhis/earlyrelease/wireless\\_state\\_201608.pdf](http://www.cdc.gov/nchs/data/nhis/earlyrelease/wireless_state_201608.pdf)

<sup>4</sup> <http://www.cdc.gov/nchs/data/nhis/earlyrelease/wireless201605.pdf>

designed with three strata: S01 - High Density AA Metro, S02 – Remaining Metro, and S03 – Non-Metro.

Stratum definitions were as follows:

We began with 2 groups of FIPS codes, Metro and Non-Metro. For both frames, landline and cell, S01 was the high-density AA stratum of the Metro Counties, and S02 was the remaining geography for the Metro Counties. S03 was the Non-Metro Counties.

For S01 on the landline side, we selected block groups in the Metro Counties that had an AA density of 70% or higher. From there, we selected the telephone thousand blocks serving those block groups that had an individual coverage of 70%/ cumulative coverage of 40%/ cumulative incidence of 90% and above. As a result of this design, we would expect an AA hit rate of 63% in this stratum. S02 was the remaining thousand blocks serving the Metro Counties.

On S01 on the cellular side, we sampled from cellular thousand blocks associated with the 4 Metro County Rate Centers with an AA density of 20% or higher. (MO-LADUE, MO-ST LOUIS, MO-TAOS, and MO-KANSASCITY). S02 was the remaining thousand blocks serving the Metro Counties.

S03 for both frames was defined by the default thousand blocks for the Non-Metro Counties.

All landline thousand blocks were defined as those that had a working bank threshold of at least 1 landline assignment.

## *Survey Administration*

Once the survey instrument was finalized, it was programmed for WYSAC's (CATI Computer assisted telephone interview) system, tested for programming errors and opened to interviews for training/practice. The field period ran from April 21<sup>st</sup> to June 3<sup>rd</sup> 2016.

Well trained WYSAC interviewers conducted the surveys in calling sessions Mondays through Thursdays from 2-9pm, on Friday and Saturday afternoons from 1-6pm, and on Sundays from 5- 9pm. Occasional calling also took place on weekdays from 11am-2pm (all times Central). A total of 34,644 different phone numbers were attempted. Phone numbers were called up to 15 times if previous attempts did not result in a completed survey, an irate refusal, or an otherwise not working number (disconnected, out-of-state, not meeting age eligibility criteria, etc.). These efforts amounted to 132,219 total interviewer dialings. Soft refusals were called back by specially trained interviewers in an attempt at refusal conversion. A total of 358 surveys were completed as a result of this refusal conversion effort (3.96% of all soft refusals).

## *Response Rates and Margins of Error*

A total of 2,008 surveys were obtained statewide. Of those, nearly three-fourths (74.9%) were completed on a cellphone. In terms of sample frame, 1,477 surveys were completed from the cellular frame, while the remaining 531 were completed in the landline frame. A total of 1,089 surveys were completed in the metro region, while 919 were completed in the non-metro region. A total of 361 surveys were completed with African American respondents in the metro region. Response rates for each of the frames and regions were as follows:

Stratum	Region	Type	Completes	AAPOR RR4 <sup>5</sup>
S01	High AA Metro	Cellular	508	6.8%
S01	High AA Metro	Landline	250	12.6%
S02	Metro	Cellular	179	7.6%
S02	Metro	Landline	75	12.0%
S03	Non-Metro	Cellular	790	8.9%
S03	Non-Metro	Landline	206	13.9%
Overall	Statewide	Combined	2008	8.8%

For the statewide data, a survey sample of 2,008 completions yields a margin of error of approximately  $\pm 2.19$  percentage points at 95% confidence. For the metro region, a sample size of 1089 yields a margin of error of approximately  $\pm 2.97$  percentage points at 95% confidence. For the non-metro region, a sample size of 919 yields a margin of error of approximately  $\pm 3.23$  percentage points at 95% confidence. Finally, for the African American subgroup of the metro sample, a sample size of 361 yields a margin of error of approximately  $\pm 4.95$  percentage points at 95% confidence.

<sup>5</sup>AAPOR Response Rate 4 (RR4) includes an estimate of what proportion of cases of unknown eligibility are actually eligible.

## Data Compilation and Weighting

At close of data collection the data were exported in the SPSS software and checked for consistency, missing data, etc. The data was then weighted by age, gender, region, and racial group to bring the overall sample distribution of those demographic variables in line with the actual population distribution of Missouri<sup>6</sup>. Additionally, weights were created so that the two regions could be analyzed independently (or in comparison). These regions were weighted by age, gender, and race to bring the sample distribution of those demographic variables in line with the actual population distribution in each region. Finally, a weight was created the African American subgroup in the metro region. This subgroup was weighted to reflect both the actual age and gender distribution of metro residents. All final weights were trimmed at the 5<sup>th</sup> and 95<sup>th</sup> percentile to reduce large weights and reduce variance.
